

## Revenue Cycle Management for Radiologists and Independent Imaging Centers

Revascent™ combines 40+ years of medical practice and specialty service revenue cycle expertise with leading-edge technology to speed cash flow and increase profitability for your practice.

### Immediate Results

See instant improvement in total days to AR, clean claim rate and reduced claim denials.

### Descriptive, Predictive, Prescriptive Analytics

Get a 360-view of trends and forecast to drive actionable insights.

### Extension of Your Team

Rely on Revascent to be your partner for your financial health while you focus on patient care.

## It's Attention to Detail that Counts

We understand the CMS guidelines, compliance requirements, and nuances that make clinical documentation, medical coding and billing for imaging services and radiology reads complex. Whether for MRIs, CT scans, ultrasound, mammography, etc., Revascent deftly coordinates and manages documentation for scenarios including:

- Comprehensive understanding of coding and billing nuances around screening and diagnostic mammography
- Coding and billing for technical and professional components of diagnostic services
  - Global surgical services
  - Referring providers
  - Prior authorization
- Multiple places of service
  - In-office
  - Independent imaging center
  - Hospital-based imaging and diagnostic services

## Independent Imaging Center Operations

### Business Operations

Revascent serves as your CFO/COO to set up and run your daily operations, focusing on profitability. Services include accounting/financial management, HR/recruiting, information and risk management, staff and patient scheduling, and marketing.

### IT Integration

Revascent also can provide integration between your radiology information system and practice management system to create an efficient, seamless billing workflow.

# RCM Services & Technology

## RCM Profitability Guide™

Revascent's proprietary analysis to assess revenue cycle current performance, pinpoint areas for improvement and forecast revenue gains.

## RCM Technology

Revascent's veteran team of revenue cycle billing experts have years of experience in multiple revenue cycle practice management systems. We provide a comprehensive, integrated solution customized to your billing needs, preserving the investment in your existing system.

## RCM Service

Government and commercial payer credentialing, claims denials and remittance management, and patient engagement.

## Education & Training

Tailored program designed to improve RCM processes, optimize workflow and ensure staff proficiency with technology, including EHR solutions. Training is available on-site, during our annual Customer User Group meeting, virtually, and just-in-time. We provide education and training during implementation and on a regular basis to meet current and future staff needs.

### Medical Coding

AAPC, AHIMA, CAC and CPC certified coders abstract medical documentation into E/M, CPT, HCPCS and diagnosis codes, safeguarding your organization from potential revenue loss and compliance risk.

### Audits & Compliance

Regular, thorough inspection of provider credentials, documentation/coding and claims and remittance processing to help ensure compliance with regulatory requirements.

## RCM Ongoing Performance Management

Analytics-driven monitoring of key metrics, payer and patient engagement and claims and revenue trends is synthesized into actionable insights and intuitive dashboards.
